

eLines™

#### Fabrication Features:

- CLASS 100 clean room manufacturing
- 1/8" – 4" tubing
- UHP orbital weld stations
- Purified purge gas
- ASME™ Section IX certified weld technicians
- 3rd certification welding procedure
- Double Bagging
- Hard Capping

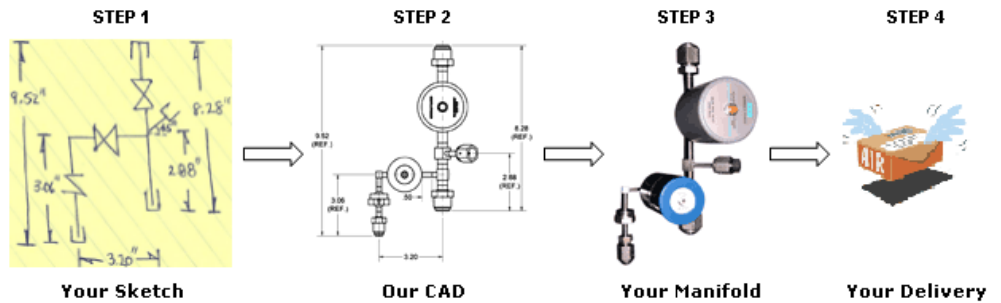

#### Additional Options:

- Inboard helium leak testing
- Outboard helium leak testing
- Pressure testing
- Particle analysis
- Chemical analysis (O2, H2O)
- Hard capping
- Double bagging

#### Typical Industries Served:

- Semiconductor
- Nanotechnology
- Research
- University
- Solar
- Government
- Healthcare
- Pharmaceutical
- Aerospace
- OEM
- Startups

From emergency welds to 2000 welds per week...use SDC eLines™

Send us a sketch and we'll forward you a quote in a matter of hours. Like our pricing? Simply place a PO and we'll begin the fabrication process immediately. Overnight to ground shipping options are available. Whatever your UHP welding requirements are, SDC is equipped to rapidly manufacture your gas lines.

#### NEED IT IMMEDIATELY?

We have a group of skilled personnel ready and waiting. With a complete stock of UHP compliant fittings, we guarantee immediate turnaround. Same day service is also available for pick up or delivery.

SDC has been a solution provider for UHP welding needs: from one of a kind, to OEM quantities since 1984. We also manufacture sub-assemblies, gas panels, gas cabinets, liquid distribution systems, bubblers, etc.

Office hours are Monday through Friday from 8:30 a.m. to 5:30 p.m. EST. For your convenience, we accept Mastercard, Visa and American Express.
